*Re: Use of Spectrum Bands Above 24 GHz for Mobile Radio Services,
GN Docket No. 14-177; IB Docket Nos. 15-256, 97-95; RM-11664; and
WT Docket No. 10-112*

Dear Ms. Dortch:

On February 5, 2018, Maureen C. McLaughlin of Iridium Communications, Inc., Scott Blake Harris of Harris, Wiltshire & Grannis LLP, and the undersigned met with Brooke Ericson, Chief of Staff to Commissioner Michael O'Rielly.

We discussed Iridium's provision of global, reliable, and low-latency communications that support the mission-critical activities of vital industrial sectors, first responders, and the U.S. government. Specifically, we discussed issues in the above-referenced proceedings regarding spectrum repurposing, spectral efficiency, policies regarding potential harmful interference, and international harmonization of the 29.1-29.25 GHz band, consistent with Iridium's comments filed on January 23, 2018 in the same above-referenced dockets.

Sincerely,

Robert M. McDowell
Counsel for Iridium Communications, Inc.
